## **DETAILED ACTION**

The receipt is acknowledged of applicant's IDS, filed 7/11/2001.

### ***Specification***

1. This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.
2. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

### ***Claim Objections***

3. Claims 4-9 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim can not depends on another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 4-9 are not been further treated on the merits.

### ***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1615

5. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

Regarding claim 1, the transitional phrase "excluding" is confusing because it is not clear if the limitations following this transitional phrase are part of the claimed invention. It is not clear if PVC is excluded or not. The abbreviation "PVC" is not acceptable in the claim.

Claims 2 and 3 recites the limitation "envelope" in claim 1. There is insufficient antecedent basis for this limitation in the claim.

In claims 2 and 3, the word "Claims" does not need to be capitalized.

### ***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claim <sup>10</sup>~~1~~ rejected under 35 U.S.C. 102(b) as being anticipated by US 5,716,988 ('988).

US '988 disclosed a pharmaceutically stable oxaliplatinum preparation comprising aqueous solution of oxaliplatinum in concentration of 1 to 5 mg/ml with pH

Art Unit: 1615

4.5-6. The aqueous oxaliplatinum solution is provided as a ready-to-use-preparation in a sealed container (abstract. The oxaliplatinum content in the preparation representing at least 95% of the initial content and the solution remains clear, colorless and free of any precipitation after storage for a pharmaceutically acceptable duration (col.2, lines 9-17). The container can be flexible pouch for infusion (col.2, lines 60-61). Plastic is inherently flexible material.

The 102 (b) rejection will be changed to 102 (a) upon submission of translation to the foreign priority document.

***Claim Rejections - 35 USC § 103***

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over US '988.

The teaching of the reference is disclosed above. The reference, however, does not disclose the multi-layered structure of the flexible bag or its material.

It is within the skill in the art to select the flexible material and to multi-layered the flexible container to provide strength and durability to the bag. No superior and unexpected results of record to show the criticality of the multi-layered bag or its

Art Unit: 1615

material. However, the reference suggests the inert material for the container and stopper (col.2, lines 48-53; col.3, lines 53-59).

Accordingly, it would have been obvious to one having ordinary skill in the art at the time of the invention to provide oxaliplatin in a flexible container as taught by the reference and make the container of multi-layers with reasonable expectation of success of the delivered bag to maintain oxaliplatin stable on long storage. Motivation would arise logically from the pharmaceutical art to have a multi-layered bag to provide more stability on storage and durability on use.

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 6,306,902 disclosed a stable oxaliplatin formulation.
